

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

### Monitoring Requirements Not Met for Phantom Hills Water System

Over the past quarter our water system failed to report all required monitoring. Even though this was not an emergency, as our customers, you have a right to know what happened and what we did to correct the situation.

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During January through March 2012 we did monitor but failed to submit the required monitoring for chlorine residual by 10 April 2012.*

The table below lists the contaminant(s) or disinfectant(s) we did test for but did not properly report for during the first quarter.

Contaminant	When samples were taken	When first quarter samples should have been reported
Chlorine	January through March 2012	10 April 2012

#### What should I do?

- There is nothing you need to do at this time.
- If you have specific health concerns, consult your doctor.

#### What does this mean?

This is not an immediate risk. If it had been, you would have been notified immediately.

#### What is being done?

The first quarters samples were noted and sent to Montana Department of Environmental Quality on Thursday April 19, 2012.

For more information, please contact Briant Jacobs at (406) 728-1880 or PO Box 17222 Missoula, MT 59808.

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*

This notice is being sent to you by Phantom Hills Water System. State Water System ID#: 4379.

Date distributed: 4/19/2012.
