

WATER USERS OF THE PHANTOM HILLS

WATER SYSTEM & WATER DISTRIBUTION SYSTEM

Our water system has been granted a 9-year waiver for asbestos sampling. Even though this is not an emergency, as our customers, you have a right to know that we are not sampling for asbestos.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. We will not conduct monitoring or testing for asbestos because we have been granted a 9-year waiver by the Montana Department of Environmental Quality Public Drinking Water Section. This waiver is based on our certification that there are no asbestos containing materials in the distribution system for the PHANTOM HILLS WATER SYSTEM public water supply.

**For questions, concerns or a copy of the waiver please contact the water operator, Briant Jacobs, at 406-728-1880
Monday through Friday 8:00 – 5:00.**
